

## COMPENG 2SH4 Project – Statement of Contribution

Your Group Name [macuilib init](#)

Your Name Insiya Khan

Your Team Member's Name Nabiha Sartaj

**You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:**

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

For this project, I worked on Iteration 0 and Iteration 1 separately. However, we came together to discuss what we did for our code. I did iteration 2A, and Iteration 3 (feature 3). We worked on feature 1 of Iteration 3 together.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

My partner also worked on Iteration 0 and Iteration 1 individually. She completed Iteration 2A and Iteration 3 (feature 2). She worked on feature 1 of Iteration 3 with me.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

Working on this project was very fun! I enjoyed collaborating with my partner through the different iterations on the code. The only downside was combining our code together using github.
